Oceanside, CA 92056

Portfolio: leondail.com
LinkedIn: [linkedin.com/in/ldail](https://www.linkedin.com/in/ldail)
Github: github.com/ldail

Skills

Front-end: JavaScript, React, Redux, SCSS, Enzyme, jQuery, HTML5, CSS3, Browser Dev Tools

Back-end: Node.js, Express, PostgreSQL, MySQL, Mocha, Chai, RESTful APIs

Other Tools: Git, GitHub, Heroku, Zeit/Now, unit/integration testing, NPM, Photoshop, web design

Related Experience

Now Playing

Live: whatsplaying.now.sh | Repository: github.com/thinkful-ei-gecko/NowPlaying-Client

Provides users a platform to engage with others while watching movies. Users are able to see comments in real-time made by others as they watch along. Now Playing utilizes the TMDB API to offer an extended breadth of movies.

Tech used: ReactJS, JavaScript, Node.js, Express, Knex, PostgreSQL, APIs, Enzyme, Jest, Mocha, Chai, Supertest, Git, HTML5, CSS3

DirectMe

Live: directme.ldailnow.sh | Repository: github.com/ldail/directme-Capstone

Developed from the ground-up with user experience as the first priority. This application utilizes categories and tag-searching to provide user-submitted results from every corner of the internet. The application creates hubs for any topic and provides links to similar websites.

Tech used: ReactJS, JavaScript, Node.js, Express, Knex, PostgreSQL, Enzyme, Jest, Mocha, Chai, Supertest, Git, HTML5, CSS3

El Instrumento

Live: client.ldail.now.sh | Repository: github.com/thinkful-ei-gecko/Smiti-Leon-new-spaced-repetition-client

Helps a user learn a language using the spaced repetition algorithm which is proven to increase the rate of learning dramatically. This version contains beginnings to learn the Spanish language, starting with the English/Spanish translations of common musical instruments.

Tech used: ReactJS, JavaScript, Node.js, Express, Knex, PostgreSQL, Enzyme, Jest, Mocha, Chai, Supertest, Git, HTML5, CSS3

Education

Thinkful - Engineering Immersion Program - *June 2019 to January 2020*

- Learned industry-best practices for software development
- Focused on React, Node.js, Express, jQuery, JavaScript, data structures and algorithms
- Designed, created, and deployed mobile-first applications
- Collaborated with a senior developer multiple times a week.
- 400+ hours peer-programming in pairs or in group projects and 300+ hours solo programming

Additional Work Experience

The Weathervane Restaurant - Event Coordinator Lead - *August 2016 to January 2019*

- Directed and trained others in following best methods for high-stakes special events.
- Required precision in every detail toward preparation and setup
- Client-facing role demanding guest satisfaction
